-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In view of applicant's Brief filed 1/29/04 and the newly found art, the finality of the rejection mailed 7/24/03 is hereby withdrawn and the amendment filed 10/27/03 has been entered.

Response to Arguments

Applicant's arguments with respect to claims 1-24 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over APA in view of Neagu, Jones, or Holzhauser et al. APA is the basic wood chipper apparatus including the use of a pivotable feed pan. The weight of the pan is a problem for the operator as it is being moved. Each of the secondary references solves this problem by showing the use of springs to assist the movement of a wall-like member (analogous to applicant's feed pan) and in effect counterbalance the weight of the pan. In order to counterbalance the feed pan weight, it would have been obvious for one of ordinary skill in the art at the time of the invention to modify APA by providing a spring assist member, taught to be desirable by each of the secondary references. Any remaining limitations would then have been obvious design choices only as they solve no stated problems. Furthermore, in the Brief, applicant did not provide any convincing arguments as to why the subject matter of the dependent claims presented in themselves allowable subject matter. Note also, that the secondary references are

considered to be analogous art since their springs are being used to counterbalance the weight of movable members.
